

## Forex Tester—Step One—Short list

---

- Go to [www.forextester.com](http://www.forextester.com)
- Click on “About Program”
- Click on “Data Sources”
- Choose the pair you want to import
- Click on Save
- Put it in a folder you’ll remember

## Forex Tester—Step Two—Short list

---

- Click on the “Show Symbol List” Button
- Click on “Add Symbol”
- Fill in the details from your broker
- Click on “Apply”

## Forex Tester—Step Three—Short list

- Click on “File”
- Click on “Import History”
- Click on “...” at the end of the field
- Browse to your filename
- “Import to Currency” should match the currency you want to import (if it is not there, you skipped step 2)
- Forex Tester defaults to GMT+1 unless you shift the hours to something else.
- Click on “Next”
- Click on “Import”
- Click on “Ok”

## **Forex Tester—Step Four—Short list**

---

- Click on “Generate Ticks” Button
- Check the pair(s) you want
- Choose an option for point generation
- Click on “Generate”
